RAPIDO

FRENCH CHARM & EXPERTISE

REMEMBER

When purchasing a RAPIDO, the unladen weight includes the weight of the vehicle's standard equipment. The unladen weight of motorhomes is determined in compliance with the laws currently in force and includes the vehicle in working order, the driver (75 kg), the gas bottle, fresh water (20 L) and fuel tanks up to 90 % of their capacity with a tolerance of +/- 5 %. All of our vehicles are certified in accordance with Regulation 1230/2012.

It is therefore the responsibility of the user to adjust the load and the number of passengers on board according to the permissible GVW, the payload and the weight of any additional equipment he installed or has had installed in the vehicle.

All data (weight / measures) are indicated with a tolerance of 5%.

Chassis: definition of the carriers different from the original commercial definitions of the chassis manufacturers.

Unladen weight: the value shown in the catalogue based on a manual gearbox and entry level engines with no towing capability.

Any accessories installed optionally or by the distributor are not included in the definition of the vehicle's unladen weight.

The weight of these elements must therefore be deducted from the vehicle's payload.

SERIE C

TECHNICAL DATA

REMEMBER

When purchasing a RAPIDO, the unladen weight includes the weight of the vehicle's standard equipment. The unladen weight of motorhomes is determined in compliance with the laws currently in force and includes the vehicle in working order, the driver (75 kg), the gas bottle, fresh water (20 L) and fuel tanks up to 90 % of their capacity with a tolerance of +/- 5 %. All of our vehicles are certified in accordance with Regulation 1230/2012.

It is therefore the responsibility of the user to adjust the load and the number of passengers on board according to the permissible GVW, the payload and the weight of any additional equipment he installed or has had installed in the vehicle.

*** 140 hp: 25 kg, 180 hp: 15 kg.

All data (weight / measures) are indicated with a tolerance of 5%.

Chassis: definition of the carriers different from the original commercial definitions of the chassis manufacturers.

Unladen weight: the value shown in the catalogue based on a manual gearbox and entry level engines with no towing capability.

Any accessories installed optionally or by the distributor are not included in the definition of the vehicle's unladen weight. The weight of these elements must therefore be deducted from the vehicle's payload.

SERIE 6F

TECHNICAL DATA

REMEMBER

When purchasing a RAPIDO, the unladen weight includes the weight of the vehicle's standard equipment. The unladen weight of motorhomes is determined in compliance with the laws currently in force and includes the vehicle in working order, the driver (75 kg), the gas bottle, fresh water (20 L) and fuel tanks up to 90 % of their capacity with a tolerance of +/- 5 %. All of our vehicles are certified in accordance with Regulation 1230/2012.

It is therefore the responsibility of the user to adjust the load and the number of passengers on board according to the permissible GVW, the payload and the weight of any additional equipment he installed or has had installed in the vehicle.

SERIE 80dF

TECHNICAL DATA

REMEMBER

When purchasing a RAPIDO, the unladen weight includes the weight of the vehicle's standard equipment. The unladen weight of motorhomes is determined in compliance with the laws currently in force and includes the vehicle in working order, the driver (75 kg), the gas bottle, fresh water (20 L) and fuel tanks up to 90 % of their capacity with a tolerance of +/- 5 %. All of our vehicles are certified in accordance with Regulation 1230/2012.

It is therefore the responsibility of the user to adjust the load and the number of passengers on board according to the permissible GVW, the payload and the weight of any additional equipment he installed or has had installed in the vehicle.

All data (weight / measures) are indicated with a tolerance of 5%.
FIAT chassis: definition of the carriers different from the original commercial definitions of the chassis manufacturers.
Unladen weight: the value shown in the catalogue based on a manual gearbox and entry level engines with no towing capability.
Any accessories installed optionally or by the distributor are not included in the definition of the vehicle's unladen weight. The weight of these elements must therefore be deducted from the vehicle's payload.

SERIE **DISTINCTION**

TECHNICAL DATA

REMEMBER

When purchasing a RAPIDO, the unladen weight includes the weight of the vehicle's standard equipment. The unladen weight of motorhomes is determined in compliance with the laws currently in force and includes the vehicle in working order, the driver (75 kg), the gas bottle, fresh water (20 L) and fuel tanks up to 90 % of their capacity with a tolerance of +/- 5 %. All of our vehicles are certified in accordance with Regulation I230/2012.

It is therefore the responsibility of the user to adjust the load and the number of passengers on board according to the permissible GVW, the payload and the weight of any additional equipment he installed or has had installed in the vehicle.

** 140 hp not available RHD. RHD models only with 180 hp option.

*** 140 hp: 25 kg, 180 hp: 15 kg.

[A] Possible reduction in registered seats. [B] See back page.

All data (weight / measures) are indicated with a tolerance of 5%.

FIAT chassis: definition of the carriers different from the original commercial definitions of the chassis manufacturers.

Unladen weight: the value shown in the catalogue based on a manual gearbox and entry level engines with no towing capability.

Any accessories installed optionally or by the distributor are not included in the definition of the vehicle's unladen weight. The weight of these elements must therefore be deducted from the vehicle's payload.

SERIE M

TECHNICAL DATA

REMEMBER

When purchasing a RAPIDO, the unladen weight includes the weight of the vehicle's standard equipment. The unladen weight of motorhomes is determined in compliance with the laws currently in force and includes the vehicle in working order, the driver (75 kg), the gas bottle, fresh water (20 L) and fuel tanks up to 90 % of their capacity with a tolerance of +/- 5 %. All of our vehicles are certified in accordance with Regulation I230/2012.

It is therefore the responsibility of the user to adjust the load and the number of passengers on board according to the permissible GVW, the payload and the weight of any additional equipment he installed or has had installed in the vehicle.

In addition to the contractual 2-year warranty for your vehicle and the manufacturers' warranties on original accessories installed during assembly, you enjoy a 5-year warranty on furniture frames and watertightness when you have your vehicle moisture-checked annually during the 4 years after it is first registered. The warranties covering all accessories installed at the dealership are provided by the original manufacturers under their terms and conditions, through the dealer. The chassis warranty is provided by the chassis manufacturer.

Cost of transport is borne by the customer. Motorhomes, campervans and vans are designed for leisure use. Under no circumstances are they intended to be used as a permanent home. Some models presented in this catalogue may be shown with optional equipment. Non-contractual photos: stylistic elements, décor and accessories not included. Since part of RAPIDO production is intended for export, the characteristics of the models may vary from one country to another; for an exact definition of the models marketed, we request you to consult your dealer.

RAPIDO reserves the right to make modifications to its models without notice. Despite the care taken in the production of this catalogue, it cannot be taken as a contractual document. Your dealer will be happy to give you any further information you may require.

[B] The technically permissible towable mass of the motor vehicle is a piece of information associated with the type approval of the completed vehicle. Based on the towbar that will be mounted on the vehicle and specific values given by the manufacturer of the towbar and the tow ball, the maximum trailer mass that the vehicle can pull may be less. The characteristics of towbar and tow ball resistance (in particular values D and S) are engraved on a plate fixed on it. Value D allows to calculate the maximum permissible mass for the towbar (MPM) with the following calculation: $MPM = (D \times T \times 1000) / [(T \times 9.81) - (1000 \times D)]$, with T = maximum vehicle mass (GVW) (in kg) and D = value (in kN) indicated on the towbar. The maximum trailer mass (in kg) is thus less than or equal to the MPM for a maximum towable mass of the vehicle that may be up to 2000 kg.
